

PRESS RELEASE

July 13, 2010

Alfa Scientific Designs, Inc. Receives FDA OTC-CLIA Clearance for Product Line Additions Oxycodone and Morphine/Opiate

Alfa Scientific (Poway, California) announced today that it expanded its portfolio of OTC-CLIA Cleared drug of abuse tests, adding Oxycodone (100 ng/mL and 300 ng/mL) and Morphine/Opiate (300 ng/mL) to its existing product range.

In all, Alfa offers the following fourteen OTC-CLIA Cleared parameters:

Drug Analyte	Cut Off Level	Status
AMP - Amphetamine	1000 ng/mL	OTC-Cleared & CLIA-Waived
BAR - Barbiturate	200 ng/mL	OTC-Cleared & CLIA-Waived
BZD - Benzodiazepine	300 ng/mL	OTC-Cleared & CLIA-Waived
COC - Cocaine	300 ng/mL	OTC-Cleared & CLIA-Waived
MET - Methamphetamine	1000 ng/mL	OTC-Cleared & CLIA-Waived
MOR/OPI - Morphine/Opiate	2000 ng/mL	OTC-Cleared & CLIA-Waived
MOR/OPI300 - Morphine/Opiate	300 ng/mL	OTC-Cleared (Complexity: Waived)
MTD - Methadone	300 ng/mL	OTC-Cleared & CLIA-Waived
OXY - Oxycodone	100 ng/mL	OTC-Cleared (Complexity: Waived)
OXY300 - Oxycodone	300 ng/mL	OTC-Cleared (Complexity: Waived)
PCP - Phencyclidine	25 ng/ml	OTC-Cleared & CLIA-Waived
TCA - Tricyclic Antidepressant	1000 ng/mL	OTC-Cleared & CLIA-Waived
THC - Marijuana	50 ng/mL	OTC-Cleared & CLIA-Waived
XTC - Ecstasy/MDMA	500 ng/mL	OTC-Cleared & CLIA-Waived

Cleared by the US FDA these OTC-CLIA products can be sold to CLIA-Waived facilities (in addition to the over-the-counter market). These tests are available in multi-drug dip cards, integrated cups, and single dip cassette formats. This greatly expands the potential market for these tests in laboratory settings, as a December 2008 CMS survey showed that over 60% of laboratories registered in CLIA-applicable states were certified under this categorization, while only a fraction of laboratory tests have been cleared for their use.
