

PRESS RELEASE

October 28, 2008

Alfa Scientific Designs, Inc. Recruits High Level Talent to Lead Company

Alfa Scientific announced today that Jim McMenemy will be joining the company as General Manager and Vice President on November 10, 2008.

With over twenty years of progressive and diverse experience in the areas of clinical diagnostics and medical devices, and an MBA in Marketing and Health Administration and BS in Biomedical Engineering/Medical Lab Technology, Jim brings a fresh and innovative leadership style to Alfa that will help us to attain rapid growth in the industry over the next few years.

Prior to joining Alfa Scientific Designs, Jim worked for Inverness Medical Innovations and held the positions of Vice President-Distribution Relations and Vice President/General Manager of Innovacon/Inverness Professional Diagnostics. From 1999 thru 2006 Jim held key positions at the highly successful lateral flow manufacturer ACON Laboratories, Inc. located in San Diego, CA. As one of ACON's first employees, he was instrumental in recruiting their key talent and substantially contributed to their presence in the industry. Over the years, Jim has also worked for Quidel Corporation (San Diego, CA), Biotest Diagnostics Corporation (Denville, NJ), and Becton Dickinson to name a few.

Alfa is excited to have someone of Jim's caliber join us to direct us in our vision. Over the next few months Alfa will be launching some key new products such as the CCD Reader, Cardiac 3-in-1 test device, as well as some other key products that are currently in development such as Strep A, Ketamine, and EDDP test devices. With our ever expanding product line and new leadership, Alfa is poised to be a leader in the in-vitro diagnostic industry.

Please join us in welcoming Jim aboard.
